Milestone 3 Feedback Summary

Homepage

- Instead of a blank page on the homescreen, show most recent posts.

- Include a description of the site and our mission on the homepage. Maybe include simple instructions on how to search/post.

Navbar

- Add logo to the top left of the navbar.

- Add navbar to every page.

- Move the "Create Report" button into the navbar.

- Put the search bar in the navbar.

- Style the search button to fit the theme of the rest of the site.

Search

- Add an option to narrow down the listed parks once a district is selected, don't force it.

- Link the map and the cards somehow, perhaps with numbers.
  If you can't link them, drop the map.

- Make the map float with the page on the search results page.

- Don't show all search results on one page.
  Add prev page and next page buttons and only show a certain amount per page.

- Make all of the cards the same size
  (Don't adjust size based on image.)

- Make the text on the cards larger.

- Add descriptions for the data on the cards
  (**Category: Garbage** instead of just **Garbage.**)

- Use a more pronounced pulldown
  (They just look like text and not a pulldown.)

- Change the pulldown so that it works on all browsers
  (Currently the options disappear if you try to click them on Mac.)

UI Layout

- Make the buttons and fields shorter on the **Login** and **Register** pages.

- Add a fake "Forgot password" link to **Login** page.

- Add a Captcha button on the **Register** page.

- On the **Register** page, make the terms of service opt-in instead of opt-out.

- Rename **Report Submission** to **Create Report.**

- On the **Create Report** page, change the text "Please enter picture" to "Please choose a picture".

- On the **Create Report** page, remove the divider line between neighborhood and park.

- On the **Create Report** page, move the file upload button to after the map.

- On the **Create Report** page, remove the terms of service button.

- Add a cancel button to the **Create Report** page.

Styling

- Choose a bootstrap package to use on every page.

- Choose a 3 color theme to use for buttons, cards, ect.

- Re-style all of the pages to use the same bootstrap package and css file.

- Use the same font on every page.

Coding Style

- Add headers to each file.
  - Purpose of module.
  - Name of Author.

- Add comments in all of the js files.
